

NADINE MLAYEH

SOFTWARE ENGINEER

Jammel, Tunisie | +216 96 424 436 | nadine.mlayah@gmail.com | [linkedin.com/in/nadine-mlayah](https://www.linkedin.com/in/nadine-mlayah) | github.com/NadineMlayah

PROFILE

Graduate Software Engineer from ISIMM with solid full-stack web development experience (Spring Boot, Angular, React, NestJS) and hands-on mobile development skills in Flutter/Dart. Experienced in REST API integration, microservices architecture, DevOps practices (Docker, Kubernetes, CI/CD), and integrating AI features (Gemini API) into production applications. Seeking a Software Engineer position to design and deploy robust, scalable web and mobile applications.

TECHNICAL SKILLS

Languages: Java, C/C++, Python, Dart, SQL
Front-end Web: React, Next.js, Angular, JavaScript, HTML/CSS
Back-end: Spring Boot, NestJS, REST API, JDBC
Mobile: Flutter, Dart, Provider, WebView, hybrid apps
AI Integration: Google Gemini API, LLM-powered feature development
Databases: MySQL, PostgreSQL, MongoDB, Supabase
DevOps & Cloud: Docker, Kubernetes, GitLab CI/CD, ArgoCD, RabbitMQ, Keycloak, MinIO, Git/GitHub, AWS

PROFESSIONAL EXPERIENCE

Software Engineering Intern — Final-Year (Capstone) Project Uptech, Tunisia Project: ThePortal — after-sales service and product management platform	Feb 2026 – Jun 2026
- Designed and developed an enterprise platform built on a microservices architecture (Spring Boot, Angular, MySQL), covering after-sales service, product, user, and event management. - Set up a complete CI/CD pipeline (GitLab CI, Kaniko, Harbor) with automated GitOps deployment via ArgoCD on a Kubernetes cluster. - Integrated RabbitMQ for asynchronous inter-service communication, Keycloak for centralized authentication (SSO/OAuth2), and MinIO for object storage.	
Full Stack Developer Intern Mobtakiron, Tunisia Project: interactive educational platform	2025
- Built a web platform enabling children to take online courses, instructors to publish lessons and exercises, and administrators to view real-time usage statistics. - Implemented the front-end with React, connected to a back-end API built with NestJS and a PostgreSQL database. - Designed the data model and statistical dashboards for tracking learning progress.	
Full Stack Developer Intern ElectroHamza, Tunisia	Aug 2024
- Designed and developed a web application for inventory and sales management in the home appliances sector, using React.js on the front-end and Spring Boot on the back-end. - Implemented advanced business modules: customer management, transaction tracking, and integration of a secure payment process.	

ACADEMIC PROJECTS

Cross-Platform E-Commerce Mobile App (Flutter) Flutter, Dart, Provider, REST API, WebView	2024
Built a mobile e-commerce app (iOS/Android) with product catalog, cart, and order tracking; used Provider for state management, integrated a REST API for product/order data syncing, and embedded a WebView for the payment module.	
AI-Powered Job Application Tracker Next.js, Supabase, Google Gemini API, TypeScript	2025
Built a full-stack web platform to track job applications, integrating the Gemini API to automatically extract structured fields (company, role, deadline, key requirements) from pasted job postings, cutting down manual data entry. Used Supabase for authentication and real-time data storage, with a Next.js front-end for a responsive dashboard.	

EDUCATION

Engineering Degree in Computer Science — Software Engineering — ISIMM, Monastir	2023 – 2026
Integrated Preparatory Cycle — ISIMM, Monastir	2021 – 2023
Baccalaureate in Computer Science — High Distinction — Lycée Jammel	2020 – 2021

CERTIFICATIONS

AWS Academy Cloud Security Foundations — May 2025 | AWS Academy Cloud Foundations — May 2025 | Hashgraph Developer Course — April 2025

EXTRACURRICULAR ACTIVITIES

Sponsoring Director — ARSII ISIMM Association | Active Member — CPU Club
Languages: Arabic (native) — French (fluent) — English (professional working proficiency)
